

YOSHIKAWA ELEX CO., LTD.

Top Message

We aim to support various industries, especially the manufacturing business.

We are sincerely grateful for your continued patronage.

We've been manufacturing power transformers and precision-sheet metal 23 years ago,
and we are fortunate enough to be celebrating our 70th year anniversary.

Since the beginning, we've continued to be great innovators,
and enhance our customer and community relations by continuously improving on what we know.
We're working on following two things.

First is "partner first".It means that each person creates objects
that are satisfactory to people other than himself and creating a happy environment.

Second, "Achieving Lean, Clean and Green".

- Lean manufacturing means we create systematic method to minimize production waste.
- Clean means being conscious of a clean production, sales and design activity.
- Green means adhere to environmental laws and regulations, and continue to develop our Human Resource.

Guided by these principles,
we continue to be a company that makes efforts to meet our customers' expectations and trust.

We look forward to making great contributions along the way and we highly appreciate your support.

YOSHIKAWA ELEX CO., LTD.
President Masaki Yoshida

Business Information

Transformer For Powers Business

Original expertise × High technical skills × Improving quality control

We control power transformer quality with each product undergoing strict criteria for judgment. With the use of automatic testers, we gain 40% more reliability than conventional testing methods. It also helps that we have the programming skills to complement the testing tools capabilities. For production, we've worked on cutting down costs and minimizing lead time by waste management, skills training, process improvements, automations, and just-in-time systems.

Precision Sheet Metal Business

Fidelity to the basic quality, technology and equipment of precision sheet metal

We have high-end facilities and are using state-of-the-art technology that pass ISO9001 GLOBAL STANDARD. We are confident we meet the various needs of our clients with high precision; from prototype to mass production, at a lesser cost.

Company Outline

Company name	YOSHIKAWA ELEX CO., LTD.
Established Date	October 15, 1948
Capital	12 Million Yen
Key Executives	Chairman and CEO Toshio Yoshida President, Representative Masaki Yoshida Outside Director Yoshihiro Tanamura Outside Director Yoshida Eriko Auditor Akiko Tanamura
Total area	Nagoya Factory 1,214 square meters Nisshin Factory 1,630 square meters Neisei Factory 901.11 square meters
Business Line	Various types of dry transformers (1VA~50KVA) AC Reactor DC Reactor Special transformer (WB, R core transformer input transformer, etc) Various types of sheet metal products Various types of pressed products Various types of mold making Assembly work
Number of employees	78 employees (As of October 9, 2018, including contractual and temporary employees)
Main Banks	Ogaki Kyoritsu bank, Takatsuji branch Nagoya bank, Yaguma branch The Bank of Tokyo-Mitsubishi UFJ, Kanayama branch
Group Companies	YOSHIKAWA ELEX TRADE(SHANGHAI) CO.,LTD. CHANGSHU MARUYOSHI ELECTRIC CO.,LTD.

History

- 1945** Started as a small personal business under the name of YOSHIDA DENKI.
- 1948** Founded YOSHIKAWA DENKI, LTD.
- 1952** Built a new factory and moved operations to current location
- 1955** Changed company name to YOSHIKAWA ELECTRIC WORKS, LTD.
- 1963** Reached a capital of 4 million yen and changed the name to YOSHIKAWA ELECTRIC CO., LTD.
- 1964** Constructed a sheet metal factory at Nisshin-cho,
Aichi-gun then started processing various types of precision sheet metal and metal cases for transformers.
- 1966** The company's capital increased to 6 million yen
- 1968** Completion of the current Head Office Building and company's capital reached 12 million yen
- 1972** Established the second Nisshin factory.
- 1982** Established Nagoya factory as headquarters and extend a office building.
- 1986** Extended the Nisshin factory office.
- 1993** Pulled the first Nisshin factory down to build a new threestoried factory with twice the area.
- 1994** Changed company name to YOSHIKAWA ELEX CO., LTD.
- 1997** Established a new Nagoya factory as headquarters and an office and a warehouse.
- 1998** The 50th anniversary of the establishment
- 2006** Started assembly business.
- 2007** Extended Nisshin factory.
- 2008** Installed a production control system (APC21) in Nisshin factory to improve efficiency.
- 2010** Established YOSHIKAWA ELEX TRADE (SHANGHAI) CO.,LTD. in China.
Installed a laser cutting machine (ML2512HVIP) made in MITSUBISHI ELECTRIC.
- 2011** Established CHANGSHU MARUYOSHI ELECTRIC CO.,LTD. in China.
- 2013** Earned a UL standard insulation system.
- 2015** Installed a hybrid bending machine (HG1704) made in AMADA.
- 2016** Masaki Yoshidawas was elected as President and there was re-structuring in the organization.
Installed a production and sale control system in the transformer department to improve efficiency.
Installed an automatic line on the blank process to realize the 24 hours operation.
Installed a dual servo bending machine (EG6013) made in AMADA.
- 2017** Established Meinishi factory (Transformer department) at Kiyosu-shi, Aichi-ken.
